

2nd International Conference on Computing and Machine Learning (CML 2025)

Ms. Aparna Krishna Bhat

Talk Title:

Critical Role of Data Governance in Wealth & Asset Management

Abstract / Profile:

Abstract: In wealth and asset management, issues such as data duplication, regulatory non-compliance, and slow data processing hinder client trust and operational efficiency. This topic will discuss items such as data consolidation, automated compliance tracking, and real-time data processing, which improve decision-making, enhance client satisfaction, and ensure stronger regulatory compliance. The benefits of these measures include increased operational speed, improved client retention, and a more responsive approach to market dynamics.
